

Elma Luxury Clean EC 90

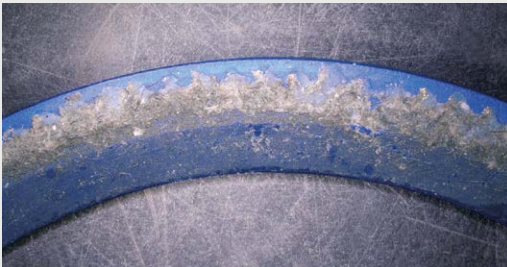

Neutral Polish & Soil Remover
suitable for all metals

EC 90

The new power cleaner for sensitive materials

EC 90 is an aqueous, neutral cleaning concentrate for cleaning jewellery and watch components (e.g. bezels, band ties, straps, ...). Moreover EC 90 hygienically refreshes the parts to be cleaned and ensures brilliant cleaning results.

- Reliably removes wear dirt and polishing paste residues
- Suitable for all metals used in the watch and jewellery sector - including aluminum
- Soft stones such as e.g. turquoise, amber as well as pearls and corals can be cleaned in an ultrasonic bath at 80 kHz or in an immersion bath
- Applicable in an ultrasonic or immersion bath at 25-70 °C
- With gentle brightening effect and integrated corrosion protection
- Very efficient: 1 l concentrate results in 50 l cleaning solution
- Pleasantly fresh odour
- No dangerous goods
