

Magnomaster - Keep it simple, keep it strong !

The only demagnetizer with sufficient power to leave the movement in its case. Similar to the Magnomatic, the demagnetizing takes effect simultaneous from both sides and therefore passes through the complete watch. The special Greiner demagnetizing process makes it fail-safe and does not allow faulty manipulations as known from « tunnel » devices.

Art. No.: 11400

New advantages:

- Bigger opening (58mm) for XL watches
- Stronger demagnetizing effect due to new higher performance components
- Electronically controlled demagnetizing process, which cannot be interrupted
- Visual feedback (green light) after demagnetizing, for operator to remove its watch
- Bracelet holder to protect case back from scratches
- Smooth base pad to protect the watch from scratches
- Main switch to save energy
- One version for 115V-230V
