

Watch bezel and ring resizing tool

Reference	Kg
167.771	3.500

This tool is designed for adjusting the size of watch bezels and retaining rings by reducing and enlarging as required. Similar to the Rolex tool no 1006 but covers more sizes. Especially useful reducing retaining rings to hold plexi crystals. Suitable for all bezels, in particular for models such as GMT-Masters, Submariners, and even up to the large diameter of the DateJust II model.

The parts are accurately machined from high quality steel, finely finished to avoid any damage to the bezel. The handle is marked with coloured guide marks to judge the degree of resizing.

Comprises :

- 1 Handle in tough plastic.
- 1 Body in steel.
- 1 End-piece for holding reduction chucks.
- 3 Stepped reduction chucks, maximum capacities of each : 46, 44, 42 mm.
- 1 End-piece for holding enlarging chucks.
- 2 Stepped enlarging chucks, maximum capacities of each : 43 and 45 mm.
- 1 Stand for the assembled tool.
- 1 Plastic carrying case.
