

VOH III - SAV

The Echappemètre VOH III-SAV is a simplified version of the adjustment device for pallets lifting patented by VOH. Its size and characteristics makes it an ideal machine for after-sales services and casual escapement fitting. With this tool, VOH offers the precision of a repute system at an attractive price.

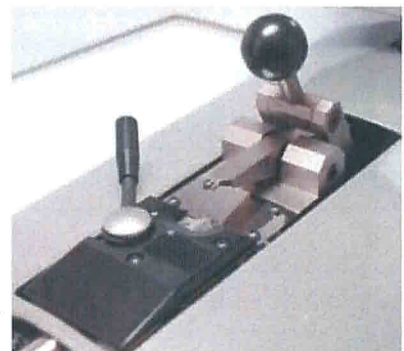

- Shift in the axis of the liftings
- Bidirectional correcting ⇄
- Correction precision $\pm 2\mu\text{m}$
- Adjustable clamping force
- Suitable for all current pallets
- Temperature selector between 70° and 160°
- LCD digital display and analogical indicator
- Overall ON / OFF switch
- General power supply by 230 VAC / 24 VDC transformer
- Carefully designed to take place on a workstation

Art. VOH 2.00032

Integrated VOH electronic control and display

A simplified mechanics adopting the proved VOH pallets lifting principles

The operating function of the VOH III-SAV is internationally patent protected.
